4. RECEIPTS OF RAW AND DIRECT-CONSUMPTION SUGAR BY PORTS OF ENTRY AND AREAS OF ORIGIN 1965	19 - 21
5. SUPPLEMENT TO "SUGAR STATISTICS" VOLUME II (REVISED) FOR HAWAII, PUERTO RICO AND VIRGIN ISLANDS	21 - 25

MARKET REVIEW

Sugar deliveries during the first quarter were quite large. To some extent this may reflect increased demand for sugar-containing products associated with the high level of personal income. Probably to a greater extent, it reflects a moderate build-up in the sugar inventories of food processors, wholesalers and retailers.

Deliveries of sugar for U. S. consumption during the first quarter of 1966 were reported at 2,265,000 tons. In addition, 31,000 tons of beet sugar and 6,000 tons of mainland cane direct-consumption sugar reported as constructive deliveries in 1965 were physically moved during the first two months of this year.

Total physical deliveries of 2,302,000 tons were about 100,000 tons more than the seasonally adjusted rate of expected consumption during this period. Any build-up of invisible stocks resulting from deliveries during the first quarter would tend to limit deliveries during the second quarter to actual needs if the invisible stocks position is maintained and to a lower than seasonal rate of deliveries if users' stocks are reduced.

Physical deliveries of beet sugar totaled 684,000 tons during the first quarter of 1966 and were 9,000 tons less than for the same period last year. It will be recalled that heavy deliveries were made in January 1965 because beet processors were unable to fully service customers at year end 1964 owing to quota limitations.

Cane sugar refiners' deliveries during the first quarter of 1966 totaled 1,555,000 tons and were 159,000 tons greater than during the first quarter of 1965. While final reports are not yet available, it would appear that refiners' receipts of quota sugar were about equal to their deliveries and that their quota stocks at the end of the quarter were at about the same level as at the beginning of the year. This suggests that about 100,000 tons of foreign sugar under set-a-sides for the first quarter actually arrived during the grace period between April 1 and April 15.

During the second quarter of 1965, quota raw sugar moving to refiners totaled 1,835,000 tons of which 1,005,000 tons were from foreign countries and 830,000 tons were from domestic sources (including the reduction of over-quota mainland cane sugar stocks held by refiners). Refiners deliveries during the second quarter of 1965 totaled 1,734,000 tons and their quota stocks increased about 85,000 tons during that period.

Receipts of quota sugar by refiners during the second quarter of 1966 are expected to exceed those for the same period last year.

The average price for domestic raw sugar during the first quarter of 1966 was 6.88 cents per pound and from April 1-22 the average was also 6.88 cents. During the same period last year the average was 6.71 cents per pound.

Refined cane sugar prices for 100 pound bags were unchanged during the period April 1-22 in the Northeast, Southeast and Gulf where the quotations remain at 10.20 cents for the Northeast and 9.80 cents in the other two territories.

In the Chicago-West territories the quoted price remained 9.55 cents for cane and 9.35 cents for beet sugar but in the direct shipping allowance territory of Illinois, southeast Wisconsin, and St. Louis, Missouri, day to day orders were being taken at 0.10 cent less. For direct-shipments to that area there was an additional 0.10 cent allowance.

On the Pacific coast, including the Northwest, the list price was 9.55 cents for both cane and beet sugar but day to day orders were being accepted at 9.40 cents per pound.

Puerto Rican sugar production continues to lag behind that of last year totaling 542,000 tons through April 17, 1966 as compared to 621,000 tons for the corresponding period last year. Sugarcane processed from this crop was 5,783,000 tons as compared to 5,929,000 tons during the same period last year. Yield of sugar per ton of cane averaged only 9.37 percent whereas last year at this time the yield was 10.48 percent. By April 17, 1965 over two-thirds of the sugar for the crop year had been produced but more cane reportedly remains for grinding this year than on that date last year.

Hawaiian sugar production through April 16, 1966 totaled 262,000 tons or 10,000 tons less than for a comparable period last year. In recent weeks the difference from last year's production has been narrowing.

ADMINISTRATIVE ACTIONS RELATING TO 1966 SUGAR SUPPLIESIncreased sugar quotas announced

Secretary of Agriculture Orville L. Freeman on April 8, 1966 announced an increase of 200,000 short tons, raw value -- from 9.8 million to 10 million tons -- in the estimate of total sugar requirements of consumers for the 1966 calendar year.

The quota of 4,439 tons for Honduras was reallocated to other countries of the Central American Common Market upon advice of the Government of Honduras that Honduras will not fill any of its quota for this year.

Based upon its 1965 crop production, the quota for Hawaii was increased by 63,474 tons. The balance of 136,526 tons of the 200,000 ton increase in the total quotas was allocated to foreign countries.

A portion of the statement of bases and considerations accompanying the action is quoted below:

Section 201 of the Act directs the Secretary to revise the determination of sugar requirements at such times during the calendar year as he deems necessary. On the eighth of December, 1965, sugar requirements of consumers for the year 1966 were established at 9,800,000 short tons, raw value. It was then estimated that actual consumption during the year would approximate 10,100,000 short tons, raw value, but total quotas were established at a level 300,000 tons lower. This was done in recognition of the possibility of inventory variations of quota sugar during the year and as a means of maintaining sugar prices in line with the objectives of the Act at a level which would protect the domestic sugar industry. At this point in the year, it is no longer necessary to keep total quotas so far below estimated consumption. It is also desirable that producers in foreign countries have as much lead time as possible in planning their shipments for arrival in this country during the latter part of the year. Accordingly, it now appears necessary and desirable to increase the estimates of sugar requirements of consumers for the calendar year 1966 by 200,000 short tons, raw value, to a total of 10,000,000 short tons, raw value.

The quota increases and revised quotas for domestic areas and foreign countries are shown in the following table:

Production area	Change in quotas	Basic quotas	Temporary quotas pursu- ant to Sec. 202(d)(1)	Proration pursuant to Sec. 202(d)(6)	Total quotas and prorations
	(1)	(2)	(3)	(4)	(5)

Total	204,232 ^{3/}	8,765,293	1,230,268	4,439	10,000,000

1/ Proration of quotas withheld from Cuba and Southern Rhodesia.

2/ Proration of Honduran quota.

3/ Includes reallocation of the quota for Honduras of 4,232 tons.

* Direct-consumption portion:

Hawaii - 34,200 tons; Puerto Rico - 150,000 tons;
 Republic of the Philippines - 59,920 tons;
 Panama - 3,817 tons; and Ireland - 5,351 tons

ADMINISTRATIVE ACTIONSDate announcedNature of action

March 25,
1966

Announced fair and reasonable wage requirements for sugarbeet work in all producing areas, effective April 4 to continue in effect until amended, superseded, or terminated.

The determination increases minimum time rates 10 cents per hour -- from \$1.25 to \$1.35 -- and increases piecework rates about 8 percent. Other provisions are the same as those of the prior determination.

Payment of wages not less than those set by the Secretary of Agriculture is a requirement that producers must meet to qualify for payments under the Sugar Act of 1948, as amended. (See March 26, 1966 Federal Register).

March 29,
1966

Announced an amendment to the Sugarbeet Worker Wage Determination which was reported on March 25. (Press Release USDA 903-66).

The amendment provides two changes: first, the increased rates will become effective April 11 instead of April 4 and, second, a rate of \$21.50 per acre for the blocking and thinning operation in California. (See April 6, 1966 Federal Register).

April 6,
1966

Announced processor allotments of the 1966 quota for the Mainland Cane Sugar Area. These allotments totaling 1,045,000 short tons, raw value, replace preliminary allotments which have been in effect since January 1, 1966 (USDA 31-66).

<u>Date announced</u>	<u>Nature of action</u>
April 6, 1966 (cont'd)	<p>Total allotments announced today represent 95 percent of the quota established for the area, pending the availability of final 1965 crop data.</p> <p>These allotments were established on the basis of a public hearing held on Feb. 9, 1966 in New Orleans. (See April 13, 1966 Federal Register).</p>
April 8, 1966	<p>Local producing areas in 21 states of the Domestic Beet Sugar Area designated as eligible for abandonment and crop deficiency payments on 1964 crop sugarbeets. (See April 14, 1966 Federal Register)</p>
April 11, 1966	<p>Amends proportionate share determination for 1966 crop of sugarbeets to clarify the authority of State Committees to determine the extent to which acreage records of farms and of farm operators in personal history areas may be considered in establishing farm proportionate shares; and authorizes crediting of personal sugarbeet production records of individuals or of a partnership forming a corporation to such corporation if appropriate ASCS officials determine that such corporation is formed by the members of the immediate family, one or more of whom has a personal production record. (See April 15, 1966 Federal Register).</p>
April 19, 1966	<p>Amends proportionate share determination for 1962 and subsequent crops of sugarbeets to remove the 75 acre per farm limitation for Maine and increases from 100 to 160 acres the maximum that may be committed to any farm in the Phoenix, Arizona locality. (See April 23, 1966 Federal Register).</p>

STATISTICAL SERIES IN THIS ISSUEHIGHLIGHTS

1. March 1966 sugar deliveries for continental U.S. consumption 815,000 short tons, raw value (preliminary) up about 39,000 tons from February 1966 and up 35,000 tons from March 1965. January-March 1966 deliveries 2,265,000 short tons, raw value, up 130,000 tons from January-March 1965. Final data for February 1966 deliveries 777,000 short tons, raw value - previously published preliminary as 782,000 tons.

2. Primary distributors' stocks April 2, 1966 were 2,526,687 short tons, raw value (preliminary), down 92,000 tons from a year ago, and down 73,000 tons from February 28, 1966. During March refiners' **stocks** increased 56,000 tons, beet processors' stocks decreased 156,000 tons, mainland cane processors' stocks increased by 32,000 tons and importers of direct consumption sugar stocks decreased about 5,000 tons.

3. Charges to quotas January 1 to March 31, 1966 were 3,444,578 short tons, raw value, leaving a balance of 6,355,422 tons to be supplied within the 9,800,000 ton total.

4. Regionally, January-February deliveries, 1966 as compared to 1965, were up in 4 of the 5 regions: Increases -- New England 22.1 percent, South 17.5 percent, Middle Atlantic 13.8 percent and West 2.2 percent. Decrease North Central 5.1 percent.

5. February 1966 distribution of corn sweeteners by corn refiners - the equivalent of 125,000 short tons raw value, down 1,000 tons from January 1966 and down 3,000 tons from February 1965. Corn sirup distribution February 1966 - 87,000 tons, down 3,000 tons from January 1966 and the same as February 1965. Distribution of dextrose February 1966 - 38,000 tons, up 2,000 tons from January 1966 and down 3,000 tons from February 1965.

1/ Establishments that acquire no raw sugar from others for refining. Processor-refiners are included with refiners.

2/ Includes Mainland cane sugar not charged to quota: Raws, 87,163; Refined, 18,750; Total, 105,913.

3/ Production less deliveries of raw sugar to refiners.

4/ Includes 173,366 tons received from mainland cane processors.

5/ Receipts of raw sugar by refiners less melt.

6/ Includes mainland cane sugar not charged to quota: Raws, 32,014; Refined, 948; Total, 32,962.

1/ Spot prices are for bulk sugar under Contract No. 7, the terms of which are duty paid or duty free, full duty rate .625 cent per pound.

2/ Spot prices are those under No. 8 Contract which is for bagged, f.o.b. and stowed at Greater Caribbean ports (including Brazil).

3/ The No. 7 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢), computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustrations see Sugar Reports 81, January 1959, pages 5 to 9.

5/ Revised.

Supplement to SUGAR STATISTICS, Volume II, for Hawaii, Puerto Rico and Virgin Islands

This supplement brings to date Statistical Bulletin No. 244, "Sugar Statistics and Related Data," Volume II (revised), issued July 1963 as it relates to the domestic cane areas of Hawaii, Puerto Rico and Virgin Islands.

Some readers may want to transcribe the data appearing in this supplement to the tables in that bulletin. A cross-reference of the tables in this supplement to the corresponding tables in Volume II is shown below. Supplements to Volume II for Hawaii, Puerto Rico and Virgin Islands appear in April 1964 and January 1965 issues of SUGAR REPORTS.

Copies of Statistical Bulletin No. 244 may be obtained upon request to the Information Division, Agricultural Stabilization and Conservation Service, U. S. Department of Agriculture, Washington, D.C., 20250
